

MARIA CLARA

DEVELOPER

Hi, I'm Maria Clara, I'm 18 years old and I'm a software developer at Philips. I started in the technology area in my high school, along with a technical course, at Instituto Federal de Santa Catarina - IFSC. There I learned about programming, arduinos, robotics, and many cool things, like set off rockets. Now, I'm doing my undergraduate degree, with the Computer Science course. I work as a Software developer at Philips, where I started as an intern

I'm doing a personal project now, with 90 days coding every day, this is a link for my repository. In these 90 days, I want to study JavaScript, React, Backend, Python, Django, PowerShell, Ionic, Flutter with Firebase and Unity.
This page, is my project for JavaScript.

I've done some cool projects in the past, like:

Project 1

Project 2

Project 3

Project 4

If you want to know any of them, just click on their name, or access my github
